for 600 KVA was taken from the Licensee at 33 KV and the agreement for 2 years was executed. The actual demand from August 2009 to December 2009 is found below 270 KVA and therefore the firm is paying minimum fixed charges which is a loss to the firm. He has further requested to allow reduction in contract demand from 600 KVA to 300 KVA.

6. On hearing the Petitioner, the Commission is of the view that as per Clause 7.9 of the MP Electricity Supply Code, 2004 (as amended from time to time), no application for reduction in contract demand shall be entertained in the first two years from the date of contract, therefore, the request of the Petitioner for reduction in contract demand from 600 KVA to 300 KVA cannot be considered at present. However, looking to the difficulties experienced by many consumers on this account, the Commission has decided to undertake review of the provisions for reduction in contract demand in MP Electricity Supply Code, 2004 (as amended from time to time) after following necessary procedure.

7. With the above directions, the Petition No. 01 of 2010 is not admitted and stands disposed off.
